

Course Description

Ceridian Business Intelligence Analytics Hands-on Virtual Classroom Workshop

Overview:

This interactive, hands-on virtual training course is an excellent solution for clients in areas that are not close to a Ceridian office. Clients complete the same program/course material as those attending a hands-on workshop at one of Ceridian's facilities. In this 1-day instructor-led hands-on workshop the student will edit predefined templates to create complex custom reports. This course includes organizing report data using breaks and sections, adding sorts and calculations, using formulas and variables and applying filters to produce customized views of the data based on unique reporting needs. Students end the day by adding charts, graphs and crosstabs in order to make data easy to analyze visually.

Who should attend: Ceridian Business Intelligence Analytics users with the user roles of Report Writer, Power User or Administrator

Facilitation:

This facilitator-led virtual hands-on interactive learning session is facilitated over a full day with time out for breaks (lunch, etc.). In this online classroom-like setting Ceridian brings the lab to you. You observe, interact and key data in the completion of practice exercises while sitting at your PC in the convenience of your own office. **Note:** All times listed are in Eastern Time (EST/EDT). If you are not in this time zone, please adjust the time to that of your area. Hands-on virtual classroom sessions are offered in English only.

Duration: 1 day

Price: \$425.00 plus applicable tax (or as per Ceridian quote/contract)
